

Exporting Your Audio for Mastering

Before we can master your audio, we need the audio portion of your edit session. This is done by exporting an AAF or OMF file. Please use the following steps. Note that some options may be located differently depending on your software.

- Select File > Export > AAF
- In the AAF Export Settings dialog box
 - Make sure the sample and bit rates match those of your project
 - Select Imbed Audio
 - Under Render, select Trim Audio Files
 - Set Handle Frames to 300
- Click OK

This will be a larger file, and should be sent via a file share platform like Google Drive, WeTransfer, or Dropbox.

Please call or email if you need further clarification.
